EJTN Judiciary Learning Grants

Empowering judiciaries through active, self-directed applied learning

Identify
EU judges, prosecutors, and trainers can identify a workplace learning need in international judicial matters and secure funding by submitting an application to their National Contact Point for an EJTN Learning Grant.

Learn
Accepted recipients of the Learning Grant execute their learning plan and collaborate and learn with peers from another EU Member State with the goal of judicial performance improvement.
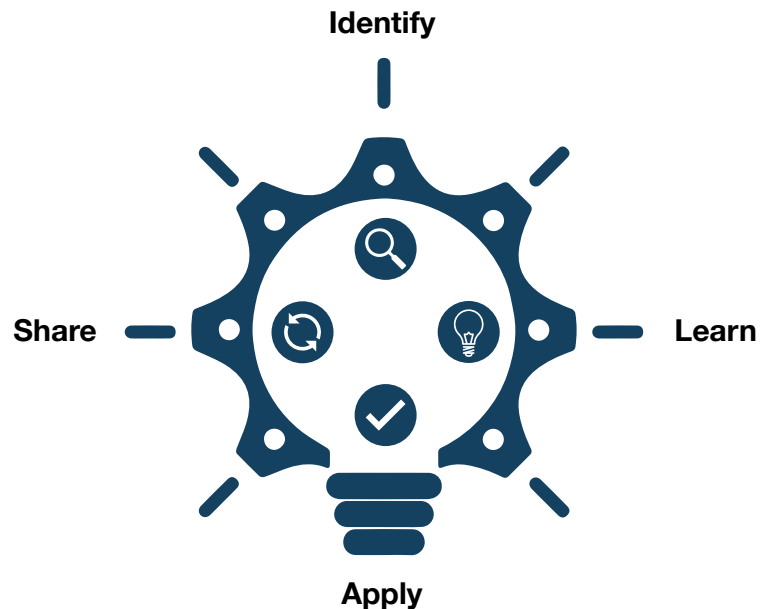

Apply
Recipients apply their knowledge within their judiciary to create more effective and efficient practices.

Share
Recipients must share their Learning Grant experience with their peers. The dissemination of knowledge is an important final step in the Learning Grant process.

The Judiciary Learning Grant Programme is a new concept organised by the European Judicial Training Network (EJTN). The programme allows judiciary staff the autonomy to self-identify and create individualised learning opportunities. Accepted proposals will allow recipients to fund travel in support of their ideas.

The objectives of the programme are to:
- Enable judiciaries to gain new knowledge through problem identification and resolution
- Enable judiciaries to set up a tailor-made and customised study.
- Strengthen judicial work and contribute to positive change through transnational dialogue, networking, and collaborative problem-solving.
- Empower judiciaries with the ability to take proactive measures to develop a more effective and efficient judicial practice using the insight gained to solve issues they may encounter in their daily work.

EU Member State judges, prosecutors and judicial trainers interested in pursuing a grant must submit an application to the National Contact Point of their home country. Applications must identify where further learning and collaboration will result in improved judicial outcomes. Applications will be reviewed on a rolling basis throughout the application period starting on 1 February 2022. A particular consideration will be given to early applicants so apply now!
